- Set up for an 8 ft. bed
- Black Matte finish 200 gallon Propoly tank with separate 10 gallon built in foam cell
- Poly pump platform
- (3) Poly channels under platform and tank for ease of installation in and out of a truck bed
- Both water tank and foam cell have visual sight gauges for water/foam levels
- Unique skid, has (2) pumps; A Darley Davy #5290BE/NPT-O gasoline powered Briggs and Stratton Vanguard commercial engine, 9 HP with electric start and built in foam tank.
- This is a twin impeller portable pump with 1.5" intake and 1.5" discharge and garden hose discharge; also has a 1-1/2" tank to pump line with valve, 1" tank fill with valve and a 1" booster reel discharge with valve. The tank is plumbed to the stainless steel electric rewind booster reel, complete with 3/4" Boost light Mercedes Textiles yellow booster hose, 100' in length and a TFT twister style nozzle and rollers and guides on one side of the reel.
- The second is a Honda GX390 gasoline engine powered high pressure CAT pump, plumbed to the foam system and water intake of the tank and also plumbed to one hand cranked rewind reel, complete with 100' + of high pressure 3/8" 3000 psi hose and a high performance twin foam high pressure pistol grip foam nozzle.
- (You can discharge high pressure water or compressed air foam with this unit)
- This unit is ideal for Wildland fire fighting and of course without the foam system, could be used for high pressure washing around the fire station. You can operate both water and foam at the same time if needed.
